### SUMMARY

I'm a front-end developer specializing in crafting ideas into user-friendly, high-performance websites. I have built perhaps more than e-commerce to secure logging on systems, making use of technologies such as HTML, CSS, Javascript, and React. Smooth, good-looking projects that run well. I always do, as I enjoy learning more and more in web development, where my skills can be applied to useful projects.

### SKILLS

HTML5 | CSS3 | BOOTSTRAP | JAVASCRIPT | WordPress | REACT.JS | REDUX | NodeJS | MongoDB | ExpressJs

### WORK EXPERIENCE

**Wep Developer (Remote)**, Big Digital Group May 2023 – present  
Abu Dhabi, UAE

- Designed and implemented a user-friendly interface that significantly improved user experience and engagement.
- Built a secure platform for buying cars online, integrating features like user authentication, payment gateways, and robust confidentiality measures.
- Worked closely with cross-functional teams to ensure projects were delivered on time and met all requirements.

### EDUCATION

**Bachelor of Engineering**, El Shorouk Academy 2015 – 2020

### PROJECTS

**Big Motors Platform**, React, React Router, Bootstrap, Email.js, Cloudinary  May 2024  
Developed a responsive car dealership platform that showcases current and sold vehicles, with detailed car information and user-friendly navigation. Integrated Cloudinary for image management and utilized pagination for an optimal browsing experience.

**Authentication-Project**  Jul 2023  
I completed a small authentication project using Node.js, Express.js, JWT, bcrypt, and MongoDB. The project features secure user registration, login, and protected routes using JWT for authentication and bcrypt for password hashing. It provided valuable experience in building robust authentication systems.

**E-commerce Platform (Amazon Clone)**, React, Redux, Firebase, Axios  May 2023  
Developed a fully functional e-commerce platform replicating the core features of Amazon. Integrated Firebase for database operations and user authentication, with React Router for seamless navigation, and Redux for state management.

**Skin-Care-Website**  Apr 2023  
In this ReactJS project, I created a responsive e-commerce website using modern CSS and React hooks. The site features engaging animations through the Framer Motion library and practical sliders using Swiper JS. My work showcases adaptability, creative problem-solving, and a strong passion for building intuitive web applications. I am eager to apply these skills to contribute to innovative projects and deliver exceptional user experiences.

**Dibruno project**  Jan 2023  
I have built a food ordering project using HTML and CSS. This project features a homepage, a menu page with categories of food items, individual pages for each food item with details, a shopping cart, and checkout. The project demonstrates my proficiency in using HTML and CSS to create visually appealing and functional web pages. Additionally, the use of JavaScript in the project allowed for more dynamic features such as real-time updates to the order summary and user input validation.
