🪪 PROFILE

I'm a front-end developer who's really passionate about bringing ideas to life through easy-to-use, fast, and engaging web experiences. I've worked on all sorts of projects—from e-commerce sites to secure login systems—using different frameworks to create clean, reliable solutions that just work. I'm always excited to learn new things and apply fresh skills to projects.

💼 WORK EXPERIENCE

Web Developer (Remote), Big Digital Group   Apr 2023 – Oct 2024
- Designed a user-friendly interface that improved user experience and engagement.   Abu Dhabi, UAE
- Worked on multiple WordPress projects, customizing themes and improving site performance.
- Built secure platforms with authentication and payment integration.
🎓 EDUCATION

Information Technology Institute (ITI),   Oct 2024
9-Month Professional Training Program (PTP) – Web & User Interface Development Track

Bachelor of Engineering, El Shorouk Academy   2015 – 2020

📂 PROJECTS

Furniro, Furniture E-Commerce Platform ⎘   Apr 2025
A modern, full-stack furniture e-commerce platform offering a seamless shopping experience.
Features include product filtering, cart management, user authentication, and secure payments .
- **Frontend:** Angular
- **Backend:** Node.js, Express
- **Database:** MongoDB
- **Payment Integration:** Stripe
Big Motors Platform ⎘   May 2024
Developed a responsive car dealership platform that showcases current and sold vehicles, with detailed car information and user-friendly navigation.
- **Frontend:** React, React Router, Bootstrap
- **Backend**: Firebase.js
- **Email Integration:** Email.js
- **Image Management:** Cloudinary

Authentication-Project ⎘   Jul 2023
I completed a small authentication project using Node.js, Express.js, JWT, bcrypt, and MongoDB. The project features secure user registration, login, and using JWT for authentication and bcrypt for password hashing. It provided valuable experience in building robust authentication systems.
- **Backend:** Node.js, Express.js
- **Authentication:** JWT, bcrypt
- **Database:** MongoDB

Skin-Care-Website ⎘   Apr 2023
Built a responsive e-commerce site with **ReactJS**, **Framer Motion** for animations, and **Swiper JS** for sliders, showcasing creativity and strong UI

Dibruno project ⎘   Jan 2023
Created a food ordering site with **HTML**, **CSS**, and **JavaScript**, featuring a homepage, menu, item details, shopping cart, and checkout, with dynamic features like real-time order updates and input validation.
